Due diligence checklist

What you need to know before buying a residential property

Before you buy a home, you should be aware of a range of issues that may affect that property and impose restrictions or obligations on you, if you buy it. This checklist aims to help you identify whether any of these issues will affect you. The questions are a starting point only and you may need to seek professional advice to answer some of them. You can find links to organisations and web pages that can help you learn more, by visiting the [Due diligence checklist page on the Consumer Affairs Victoria website](http://consumer.vic.gov.au/duediligencechecklist) (consumer.vic.gov.au/duediligencechecklist).

Urban living

Moving to the inner city?

High density areas are attractive for their entertainment and service areas, but these activities create increased traffic as well as noise and odours from businesses and people. Familiarising yourself with the character of the area will give you a balanced understanding of what to expect.

Is the property subject to an owners corporation?

If the property is part of a subdivision with common property such as driveways or grounds, it may be subject to an owners corporation. You may be required to pay fees and follow rules that restrict what you can do on your property, such as a ban on pet ownership.

Growth areas

Are you moving to a growth area?

You should investigate whether you will be required to pay a growth areas infrastructure contribution.

Flood and fire risk

Does this property experience flooding or bushfire?

Properties are sometimes subject to the risk of fire and flooding due to their location. You should properly investigate these risks and consider their implications for land management, buildings and insurance premiums.

Rural properties

Moving to the country?

If you are looking at property in a rural zone, consider:

- Is the surrounding land use compatible with your lifestyle expectations? Farming can create noise or odour that may be at odds with your expectations of a rural lifestyle.
- Are you considering removing native vegetation? There are regulations which affect your ability to remove native vegetation on private property.
- Do you understand your obligations to manage weeds and pest animals?

Can you build new dwellings?

Does the property adjoin crown land, have a water frontage, contain a disused government road, or are there any crown licences associated with the land?

Is there any earth resource activity such as mining in the area?

You may wish to find out more about exploration, mining and quarrying activity on or near the property and consider the issue of petroleum, geothermal and greenhouse gas sequestration permits, leases and licences, extractive industry authorisations and mineral licences.

Soil and groundwater contamination

Has previous land use affected the soil or groundwater?

You should consider whether past activities, including the use of adjacent land, may have caused contamination at the site and whether this may prevent you from doing certain things to or on the land in the future.

(04/10/2016)

Land boundaries

Do you know the exact boundary of the property?

You should compare the measurements shown on the title document with actual fences and buildings on the property, to make sure the boundaries match. If you have concerns about this, you can speak to your lawyer or conveyancer, or commission a site survey to establish property boundaries.

Planning controls

Can you change how the property is used, or the buildings on it?

All land is subject to a planning scheme, run by the local council. How the property is zoned and any overlays that may apply, will determine how the land can be used. This may restrict such things as whether you can build on vacant land or how you can alter or develop the land and its buildings over time.

The local council can give you advice about the planning scheme, as well as details of any other restrictions that may apply, such as design guidelines or bushfire safety design. There may also be restrictions – known as encumbrances – on the property's title, which prevent you from developing the property. You can find out about encumbrances by looking at the section 32 statement.

Are there any proposed or granted planning permits?

The local council can advise you if there are any proposed or issued planning permits for any properties close by. Significant developments in your area may change the local 'character' (predominant style of the area) and may increase noise or traffic near the property.

Safety

Is the building safe to live in?

Building laws are in place to ensure building safety. Professional building inspections can help you assess the property for electrical safety, possible illegal building work, adequate pool or spa fencing and the presence of asbestos, termites, or other potential hazards.

Building permits

Have any buildings or retaining walls on the property been altered, or do you plan to alter them?

There are laws and regulations about how buildings and retaining walls are constructed, which you may wish to investigate to ensure any completed or proposed building work is approved. The local council may be able to give you information about any building permits issued for recent building works done to the property, and what you must do to plan new work. You can also commission a private building surveyor's assessment.

Are any recent building or renovation works covered by insurance?

Ask the vendor if there is any owner-builder insurance or builder's warranty to cover defects in the work done to the property.

Utilities and essential services

Does the property have working connections for water, sewerage, electricity, gas, telephone and internet?

Unconnected services may not be available, or may incur a fee to connect. You may also need to choose from a range of suppliers for these services. This may be particularly important in rural areas where some services are not available.

Buyers' rights

Do you know your rights when buying a property?

The contract of sale and section 32 statement contain important information about the property, so you should request to see these and read them thoroughly. Many people engage a lawyer or conveyancer to help them understand the contracts and ensure the sale goes through correctly. If you intend to hire a professional, you should consider speaking to them before you commit to the sale. There are also important rules about the way private sales and auctions are conducted. These may include a cooling-off period and specific rights associated with 'off the plan' sales. The important thing to remember is that, as the buyer, you have rights.

Notes to Certificate - Land Tax

Certificate No: 94000078

Power to issue Certificate

1. Pursuant to section 95AA of the *Taxation Administration Act 1997*, the Commissioner of State Revenue must issue a Property Clearance Certificate (Certificate) to an owner, mortgagee or bona fide purchaser of land who makes an application specifying the land for which the Certificate is sought and pays the application fee.

Amount shown on Certificate

2. The Certificate shows any land tax (including Vacant Residential Land Tax, interest and penalty tax) that is due and unpaid on the land described in the Certificate at the date of issue. In addition, it may show:
 - Land tax that has been assessed but is not yet due,
 - Land tax for the current tax year that has not yet been assessed, and
 - Any other information that the Commissioner sees fit to include, such as the amount of land tax applicable to the land on a single holding basis and other debts with respect to the property payable to the Commissioner.

Land tax is a first charge on land

3. Unpaid land tax (including Vacant Residential Land Tax, interest and penalty tax) is a first charge on the land to which it relates. This means it has priority over any other encumbrances on the land, such as a mortgage, and will continue as a charge even if ownership of the land is transferred. Therefore, a purchaser may become liable for any such unpaid land tax.

Information for the purchaser

4. Pursuant to section 96 of the *Land Tax Act 2005*, if a purchaser of the land described in the Certificate has applied for and obtained a certificate, the amount recoverable from the purchaser by the Commissioner cannot exceed the amount set out in the certificate, described as the "Current Land Tax Charge and Vacant Residential Land Tax Charge" overleaf. A purchaser cannot rely on a Certificate obtained by the vendor.

Information for the vendor

5. Despite the issue of a Certificate, the Commissioner may recover a land tax liability from a vendor, including any amount identified on this Certificate.

Apportioning or passing on land tax to a purchaser

6. A vendor is prohibited from apportioning or passing on land tax including vacant residential land tax, interest and penalty tax to a purchaser under a contract of sale of land entered into on or after 1 January 2024, where the purchase price is less than \$10 million (to be indexed annually from 1 January 2025, as set out on the website for Consumer Affairs Victoria).

General information

7. A Certificate showing no liability for the land does not mean that the land is exempt from land tax. It means that there is nothing to pay at the date of the Certificate.
8. An updated Certificate may be requested free of charge via our website, if:
 - The request is within 90 days of the original Certificate's issue date, and
 - There is no change to the parties involved in the transaction for which the Certificate was originally requested.

Certificate No: 94000078

Power to issue Certificate

1. Pursuant to section 95AA of the *Taxation Administration Act 1997*, the Commissioner of State Revenue must issue a Property Clearance Certificate (Certificate) to an owner, mortgagee or bona fide purchaser of land who makes an application specifying the land for which the Certificate is sought and pays the application fee.

Amount shown on Certificate

2. The Certificate shows any commercial and industrial property tax (including interest and penalty tax) that is due and unpaid on the land described in the Certificate at the date of issue.

Australian Valuation Property Classification Code (AVPCC)

3. The Certificate may show one or more AVPCC in respect of land described in the Certificate. The AVPCC shown on the Certificate is the AVPCC allocated to the land in the most recent of the following valuation(s) of the land under the *Valuation of Land Act 1960*:
 - a general valuation of the land;
 - a supplementary valuation of the land returned after the general valuation.
4. The AVPCC(s) shown in respect of land described on the Certificate can be relevant to determine if the land has a qualifying use, within the meaning given by section 4 of the *Commercial and Industrial Property Tax Reform Act 2024* (CIPT Act). Section 4 of the CIPT Act Land provides that land will have a qualifying use if:
 - the land has been allocated one, or more than one, AVPCC in the latest valuation, all of which are in the range 200-499 and/or 600-699 in the Valuation Best Practice Specifications Guidelines (the requisite range);
 - the land has been allocated more than one AVPCC in the latest valuation, one or more of which are inside the requisite range and one or more of which are outside the requisite range, and the land is used solely or primarily for a use described in an AVPCC in the requisite range; or
 - the land is used solely or primarily as eligible student accommodation, within the meaning of section 3 of the CIPT Act.

Commercial and industrial property tax information

5. If the Commissioner has identified that land described in the Certificate is tax reform scheme land within the meaning given by section 3 of the CIPT Act, the Certificate may show in respect of the land:
 - the date on which the land became tax reform scheme land;
 - whether the entry interest (within the meaning given by section 3 of the Duties Act 2000) in relation to the tax reform scheme land was a 100% interest (a whole interest) or an interest of less than 100% (a partial interest); and
 - the date on which the land will become subject to the commercial and industrial property tax.
6. A Certificate that does not show any of the above information in respect of land described in the Certificate does not mean that the land is not tax reform scheme land. It means that the Commissioner has not identified that the land is tax reform scheme land at the date of issue of the Certificate. The Commissioner may identify that the land is tax reform scheme land after the date of issue of the Certificate.

Change of use of tax reform scheme land

7. Pursuant to section 34 of the CIPT Act, an owner of tax reform scheme land must notify the Commissioner of certain changes of use of tax reform scheme land (or part of the land) including if the actual use of the land changes to a use not described in any AVPCC in the range 200-499 and/or 600-699. The notification

must be given to the Commissioner within 30 days of the change of use.

Commercial and industrial property tax is a first charge on land

8. Commercial and industrial property tax (including any interest and penalty tax) is a first charge on the land to which the commercial and industrial property tax is payable. This means it has priority over any other encumbrances on the land, such as a mortgage, and will continue as a charge even if ownership of the land is transferred. Therefore, a purchaser may become liable for any unpaid commercial and industrial property tax.

Information for the purchaser

9. Pursuant to section 27 of the CIPT Act, if a bona fide purchaser for value of the land described in the Certificate applies for and obtains a Certificate in respect of the land, the maximum amount recoverable from the purchaser is the amount set out in the Certificate. A purchaser cannot rely on a Certificate obtained by the vendor.

Information for the vendor

10. Despite the issue of a Certificate, the Commissioner may recover a commercial and industrial property tax liability from a vendor, including any amount identified on this Certificate.

Passing on commercial and industrial property tax to a purchaser

11. A vendor is prohibited from apportioning or passing on commercial and industrial property tax to a purchaser under a contract of sale of land entered into on or after 1 July 2024 where the purchase price is less than \$10 million (to be indexed annually from 1 January 2025, as set out on the website for Consumer Affairs Victoria).

General information

12. Land enters the tax reform scheme if there is an entry transaction, entry consolidation or entry subdivision in respect of the land (within the meaning given to those terms in the CIPT Act). Land generally enters the reform on the date on which an entry transaction occurs in respect of the land (or the first date on which land from which the subject land was derived (by consolidation or subdivision) entered the reform).
13. The Duties Act includes exemptions from duty, in certain circumstances, for an eligible transaction (such as a transfer) of tax reform scheme land that has a qualifying use on the date of the transaction. The exemptions apply differently based on whether the entry interest in relation to the land was a whole interest or a partial interest. For more information, please refer to www.sro.vic.gov.au/CIPT.
14. A Certificate showing no liability for the land does not mean that the land is exempt from commercial and industrial property tax. It means that there is nothing to pay at the date of the Certificate.
15. An updated Certificate may be requested free of charge via our website, if:
 - the request is within 90 days of the original Certificate's issue date, and
 - there is no change to the parties involved in the transaction for which the Certificate was originally requested.

Section 145 of the Water Act 1989 details the legislative rights and responsibilities of both the applicant and Yarra Valley Water in relation to connection, alteration or removal and discharging to the works of Yarra Valley Water. These Conditions of Connection set out the terms and conditions to be satisfied for connecting a property to sewer, potable and recycled water.

These conditions are binding on successor-in-title of the person who applied for that consent, under section 145 of the Water Act 1989. If you are not the owner of the property, please provide a copy of this letter to the owner.

The Conditions of Connection must be handed to the Licensed Plumber. Any work which these Conditions of Connection require you to undertake, must be done by a Licensed Plumber, engaged by you, at your cost.

It is the Licensed Plumber's responsibility to ensure that the plumbing and drainage work is completed in accordance with the relevant plumbing regulations and to the satisfaction of the Victorian Building Authority – Plumbing.

Any sewer connection branch and the connecting works must be installed so that they comply, in all respects, with the:

- Plumbing Regulations 1998 (Vic);
 - Water Industry Regulations 2006 (Vic);
 - Building Act 1993 (Vic);
 - Relevant AS/NZS series of standards applicable to sewer connection branch and connecting works from time to time,

WATER

General water supply(s) are to be installed as referenced in the table of approval details of this document as required services. The table includes water main and connection details. In a mandated recycled water area recycling connections also apply and are referenced in the same table.

The pressure in this area is above 500kPa or will increase above 500kPa in the future for the potable water connection. A Pressure Limiting Valve (PLV) must be fitted by the Licensed Plumber at the time

of connection.

The pressure in this area is above 500kPa or will increase above 500kPa in the future for the recycled water connection. A Pressure Limiting Valve (PLV) must be fitted by the Licensed Plumber at the time of connection.

For 20mm and 25mm services and all services where a manifold is to be installed, the service pipe, including a meter assembly with a temporary spacer pipe and any relevant backflow device must be installed by the plumber, prior to the time of the tapping or meter installation. Meters are installed by Yarra Valley Waters plumbing contractor. For 32mm and larger services, the meter will be delivered to you and must be installed on the property prior to the tapping. The service pipe must also be installed prior to the tapping. All manifolds are to be located below ground and must be left exposed for Yarra Valley Water's plumbing contractor to inspect prior to installation of the meters. Failure to comply will result in the tapping being cancelled. A rebooking fee will be applicable when rebooking the tapping.

All tapplings, pluggings and metering products can be arranged using easyACCESS. Work must be carried out in accordance with the Water Metering & Servicing Guidelines (see our website). Once all fees have been paid and you are ready to book your plumbing products, please contact Yarra Valley Waters contractor Mondo on 1300 735 328. A phone call is not required if products are New Estate Connections or Combo Drinking Water & Recycled Water. Please allow a minimum of 10 business days' notice when contacting Mondo.

All meters are supplied by Yarra Valley Water after payment of the relevant fees.

If the tapping and/or plugging is required to be performed outside of business hours, either at your request or as determined by Yarra Valley Water's plumbing contractor, an additional after hours fee will apply.

Meters are not permitted to be installed inside units/dwellings. In all situations where the meter is deemed inaccessible, either by your advice, or as determined by Yarra Valley Water plumbing contractor, remote read meters must be fitted at your cost. Remote read meters must be installed in the following circumstances: high rise developments; any water meter which is located where Yarra Valley Water will have to enter a building to read the meter; where access to the meter will be restricted by gates/fences. If you are aware that remote read meters will be required, please inform the easyACCESS staff at the time of booking.

For all tapplings and/or pluggings, it is the responsibility of the person performing the excavation to obtain a Road Opening Permit from the local municipal authority before any excavation work commences. All traffic management requirements contained in the Road Opening permit must be complied with. The excavation must expose the main at the tapping/plugging point and be made safe prior to the tapping / plugging appointment time. If you choose to have Yarra Valley Waters plumbing contractor carry out the excavation, Yarra Valley Water will organize the necessary permit at an additional cost on a per road opening basis.

Failure to comply with any of these requirements will result in the booking being cancelled and a rebooking fee will apply.

Yarra Valley Waters plumbing contractor can be contacted on 1300 735 328

The dry tapping will be completed within 4 working days of your booking. Please note that if the location of the dry tapping is not suitable, a plug and retap will be required and a fee will apply. Should you wish to reschedule the booking, Yarra Valley Water's plumbing contractor can be contacted on 1300 735 328. If you wish to cancel the booking you will need to contact Yarra Valley Water (if applicable) to seek a refund. A cancellation fee may apply.

METER ASSEMBLIES & POSITIONING

It is the responsibility of the private plumber to ensure that containment, zone and individual backflow prevention is provided.

Water meter assemblies:

- a) Must be within 2 metres of the title boundary that abuts the water main

- f) Can be installed in utility rooms or meter cabinets located within a common access area and must be readily accessible, subject to Yarra Valley Water's approval

If meters need to be moved >600mm a plugging and re-tapping must be booked and the relevant fee paid.

Meters which are in a public space such as a reserve or school must be protected by an appropriate cage to prevent tampering.

Meters are not permitted to be installed in pits unless prior approval has been given by Yarra Valley Water.

Meter assemblies must adhere to the meter installation diagrams available on the Yarra Valley Water website (www.yvw.com.au) to ensure the installations meet the required standard.

REMOVAL OF WATER METERS

Only Yarra Valley Water's plumbing contractor is permitted to remove water meters.

If redevelopment of the site is occurring and the meter is no longer required, a plugging of the service must be arranged and the meter will be collected by our contractor at the time of the plugging.

DAMAGED OR STOLEN METERS

If the builder/plumber damage a meter or meter assembly, it is the responsibility of the builder/plumber to rectify these assets back to the same condition as at time of installation by Yarra Valley Water.

- Failure to do so will result in Yarra Valley Water making the necessary amendments and recovering these costs from the property owner.

Section 145 of the Water Act 1989 details the legislative rights and responsibilities of both the applicant and Yarra Valley Water in relation to connection, alteration or removal and discharging to the works of Yarra Valley Water. These Conditions of Connection set out the terms and conditions to be satisfied for connecting a property to sewer, potable and recycled water.

These conditions are binding on successor-in-title of the person who applied for that consent, under section 145 of the Water Act 1989. If you are not the owner of the property, please provide a copy of this letter to the owner.

The Conditions of Connection must be handed to the Licensed Plumber. Any work which these Conditions of Connection require you to undertake, must be done by a Licensed Plumber, engaged by you, at your cost.

It is the Licensed Plumber's responsibility to ensure that the plumbing and drainage work is completed in accordance with the relevant plumbing regulations and to the satisfaction of the Victorian Building Authority – Plumbing.

Any sewer connection branch and the connecting works must be installed so that they comply, in all respects, with the:

- Plumbing Regulations 1998 (Vic);
 - Water Industry Regulations 2006 (Vic);
 - Building Act 1993 (Vic);
 - Relevant AS/NZS series of standards applicable to sewer connection branch and connecting works from time to time,
- and any other technical requirements which we reasonably specify.

It is the responsibility of the person performing any excavation in a road reserve to obtain a Road Opening Permit from the relevant Authority before any excavation work commences. All traffic management requirements contained in the permit must be complied with.

6. Inspections For Recycled Water Plumbing Works

6.1. The plumber is required to register and book inspections via Yarra Valley Water's online booking system (www.yvw.com.au/rwinspection). Inspections are mandatory and required at the stages below:

(a) R1 – All below ground pipework prior to backfilling

- (i) For Houses and High Rise developments an R1 inspection must be done from the main meter to the building
- (ii) For Multi-Unit developments an R1 inspection must be done for the internal main between the main meter and the check meters. R1 inspections are then required for each unit from the check meter to each dwelling
- (iii) For larger, more complex developments multiple R1 inspections may be required to inspect all the below ground pipework in stages
- (iv) Irrigation Systems require inspection of all below ground pipework

(b) R2 – All internal pipework prior to plastering

- (i) For High-Rise developments separate R2 inspections must be booked for the common pipework on each floor servicing each dwelling

(c) R3– Commissioning prior to occupancy

- (i) The site must have passed the R1 and R2 inspections before the R3 can be done
- (ii) All tap-ware and plumbing fixtures must be fitted and operational

- 6.6. R2 inspections can only be booked on metered properties or where a test bucket has been used to pressurise the pipework
- 6.7. For R3 inspections the plumber will be contacted by the next business day to confirm the inspection time
- 6.8. Safe access to the site must be provided for inspections to take place
- 6.9. Failure to book inspections will result in penalties. Refer Section 1.
- 6.10. A PIC Consent Number is required for every property/residence being booked for inspections. Contact Yarra Valley Water if you do not have a PIC number for every property/residence being inspected:
 - (a) For unit developments a Stage 1 (R1) inspection is also required from the main meter to the check meters, therefore a PIC Consent Number is also required for the main to check inspection.
- 6.11. Straight bridging pieces where a meter is missing are not acceptable due to the risk of backflow contamination:
 - (a) Properties using a straight piece will not pass these inspections.
- 6.12. Yarra Valley Water will only carry out the required inspections in so far as they relate to the Conditions of Connection issued for new developments connecting to recycled water. Yarra Valley Water will take the necessary action required to rectify the meters and recover any costs in doing so from the applicant or property owner as required. Rectification may include disconnection of services, relocating meters back to their original position, or if this is not possible plugging and re-tapping to a new location.

10.4. Meters which are in a public space such as a reserve or school must be protected by an appropriate cage to prevent tampering.

10.5. Meters are not permitted to be installed in pits unless prior approval has been given by Yarra Valley Water.

- (b) Annual testing of the backflow prevention device is required to ensure the device is operating correctly
- (c) Signage must be produced at the owner's expense and displayed prominently within 150mm of all recycled water outlets. These signs should comply with AS1319 and should contain the wording: "Recycled Water Do Not Drink".

12.3. The conditions detailed in this document are binding on subsequent owners.

SEWER

Where a proposed development is to be constructed boundary to boundary and there is no compliant location for a sewer connection point within the property, Yarra Valley Water (YVW) approves the connection point of the YVW sewer to be located in a road reserve outside the property and raised to surface with an appropriate approved cover. The sewer connection point must meet the required clearances from proposed structures as per the Build Over Easement Guidelines. Approval may be required for private plumbing located in road reserves by Council or VicRoads. Any unused sewer connection points at the site must be cut and sealed by a YVW accredited live sewer contractor.

Ownership boundaries for the sewer connection point can be found at <https://www.yvw.com.au/faults-works/responsibilities/repair-responsibilities>
