► ESTIMATED RENTAL AMOUNT

Here we provide an estimate of the property's weekly rental value based on statistical data.

Estimated Rent:	\$811/W	 Medium Confidence
Estimated Rent Range:	\$689/W - \$933/W	
Estimated Yield:	2.79%	

This rental estimate is provided by CoreLogic, and is based on statistical market data such as recent advertised rental properties, property size, number of bedrooms and many more factors. Estimated gross rental yield is also a computer generated estimate and does not take into account any expenses associated with keeping the property. Information used in these estimates comes from public data, which may be incomplete or inaccurate, and should not be used in lieu of a professional appraisal under any circumstances, including for lending purposes or in home loan applications.

How to read this estimate

The estimate has been broken into three confidence level categories based on the criteria listed below.

-  High confidence is typically caused by a low degree of variability between the subject and comparable properties and/or high availability of comparable property data in the area.
-  Medium confidence is typically caused by a medium degree of variability between the subject and comparable properties and/or medium availability of comparable property data in the area.
-  Low confidence is typically caused by a high degree of variability between the subject and comparable properties and/or low availability of comparable property data in the area.

Doing your research

This estimate is a starting point only. To determine the property's value we recommend you supplement this estimate by doing other research to take into account a property's special features and current market conditions. You may want to consider:

- visiting the house (where possible)
- requesting a valuation from a licensed valuer
- recent advertised rental prices for similar properties in the area
- contacting an agent for a price guide on this property or similar
- recent and historical rental price details for this property
- the costs associated with owning, maintaining and renting this property

Mapping Data

A map showing boundaries of a property is indicative only and may not be complete or accurate. Any map that is produced is not intended or designed to replace the certificate of title or land survey information. If you need a certificate of title or land survey information for any purpose, then you can order these separately from Cotality or the relevant government body.

An automated valuation model estimate (**AVM Estimate**) is a statistically derived estimate of the sale or rental value (as the context requires) of the subject property. An AVM Estimate is generated (i) by a computer driven mathematical model in reliance on available data; (ii) without the physical inspection of the subject property; (iii) without taking into account any market conditions (including building, planning, or economic), and/or (iv) without identifying observable features or risks (including adverse environmental issues, state of repair, improvements, renovations, aesthetics, views or aspect) which may, together or separately, affect the value.

An AVM Estimate is current only at the date of publication or supply. An AVM Estimate must not be relied upon as a professional valuation or an accurate representation of the market sale or rental value of the subject property. Cotality expressly excludes any warranties and representations that an AVM Estimate is an accurate representation as to the market sale or rental value of the subject property.

To the full extent permitted by law, Cotality excludes all liability for any loss or damage howsoever arising or suffered by the recipient, whether as a result of the recipient's reliance on the accuracy of an AVM Estimate or otherwise arising in connection with an AVM Estimate.
