Part A – Parties and land

Part C – Statement with respect to required particulars

Part D – Certificate with respect to prescribed inquiries by registered agent

Schedule

Preliminary

To the purchaser:

The purpose of a statement under section 7 of the *Land and Business (Sale and Conveyancing) Act 1994* is to put you on notice of certain particulars concerning the land to be acquired. If you intend to carry out building work on the land, change the use of the land or divide the land, you should make further inquiries to determine whether this will be permitted. For example, building work may not be permitted on land not connected to a sewerage system or common drainage scheme if the land is near a watercourse, dam, bore or the River Murray and Lakes.

The *Aboriginal Heritage Act 1988* protects any Aboriginal site or object on the land. Details of any such site or object may be sought from the "traditional owners" as defined in that Act.

If you desire additional information, it is up to you to make further inquiries as appropriate.

Instructions to the vendor for completing this statement:

☐ means the Part, Division, particulars or item may not be applicable.
If it is applicable, ensure the box is ticked and complete the Part, Division, particulars or item.
If it is not applicable, ensure the box is empty or strike out the Part, Division, particulars or item. Alternatively, the Part, Division, particulars or item may be omitted, but not in the case of an item or heading in the table of particulars in Division 1 of the Schedule that is required by the instructions at the head of that table to be retained as part of this statement.

* means strike out or omit the option that is not applicable.

All questions must be answered with a YES or NO (inserted in the place indicated by a rectangle or square brackets below or to the side of the question).

If there is insufficient space to provide any particulars required, continue on attachments.

You may notify the vendor of your intention not to be bound by the contract for the sale of the land UNLESS –

- (b) you purchased on the same day as you, or some person on your behalf, bid at the auction of the land; or

- (g) the contract also provides for the sale of a business that is not a small business.

2 – Time for Service

The cooling-off notice must be served –

- (a) if this form is served on you before the making of the contract – before the end of the second clear business day after the day on which the contract was made; or
- (b) if this form is served on you after the making of the contract – before the end of the second clear business day from the day on which this form is served.

However, if this form is not served on you at least 2 clear business days before the time at which settlement takes place, the cooling-off notice may be served at any time before settlement.

Note –

Section 5(3) of the *Land and Business (Sale and Conveyancing) Act 1994* places the onus of proving the giving of the cooling-off notice on the purchaser. It is therefore strongly recommended that –

- (a) if you intend to serve the notice by leaving it for the vendor's agent at the agent's address for service or an address nominated by the agent, you obtain an acknowledgment of service of the notice in writing; or
- (b) if you intend to serve the notice by fax or email, you obtain a record of the transmission of the fax or email.

5 – Effect of service

If you serve such cooling-off notice on the vendor, the contract will be taken to have been rescinded at the time when the notice was served. You are then entitled to the return of any money you paid under the contract other than –

- (a) the amount of any deposit paid if the deposit did not exceed \$100; or
- (b) an amount paid for an option to purchase the land.

FORM 1 – STATEMENT UNDER SECTION 7 (*Land and Business (Sale and Conveyancing) Act 1994*)

3

PROCEEDING WITH THE PURCHASE

If you wish to proceed with the purchase –

- (a) it is strongly recommended that you take steps to make sure your interest in the property is adequately insured against loss or damage; and

Buyers information notice

Prescribed notice to be given to purchaser

Before you buy a home there are a number of things that you should investigate and consider. Though it may not be obvious at the time, there could be matters that may affect your enjoyment of the property, the safety of people on the property or the value of the property.

The following questions may help you to identify if a property is appropriate to purchase. In many cases the questions relate to a variety of laws and standards. Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)

Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*, section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

Land Tax Act 1936 and Regulations thereunder

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

Landscape South Australia 2019

Water Resources Management - Taking of underground water

Under the provisions of the *Landscape South Australia Act 2019*, if you intend to utilise underground water on the land subject to this enquiry the following apply:

- A licensed well driller is required to undertake all work on any well/bore
- Work on all wells/bores is to be undertaken in accordance with the *General specification for well drilling operations affecting water in South Australia*.

6 - Further information held by councils

Does the council hold details of any development approvals relating to:

- a) commercial or industrial activity at the land; or
- b) a change in the use of the land or part of the land (within the meaning of the *Planning, Development Act 1993*) or the *Planning, Development and Infrastructure Act 2016*?

NO

Description of the nature of the development(s) approved:

Refer to the repealed *Development Act 1993* Section of this document particularly Part 3 Development Plan, Section 42 – Condition (that continues to apply) of a development authorisation and Repealed Act conditions listed in this document.

The question relates to information that the council for the area in which the land is situated may hold. If the council answers "YES" to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from the council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A "YES" answer to paragraph (a) of the question may indicate that a **potentially contaminating activity** has taken place at the land (see sections 103C and 103H of the *Environment Protection Act 1993*) and that assessments or remediation of the land may be required at some future time.

It should be noted that—

- the approval of development by a council does not necessarily mean that the development has taken place;
- the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.

1. Except where minor amendments may be required by other relevant acts, or by conditions imposed by this application, the development is to be established in strict accordance with the endorsed stamped details and plans submitted in Development Application 040/2155/13 and all works shall be completed to the reasonable satisfaction of Council prior to the occupation and/or use of the development.
2. The external materials and finishes of the new building shall match/be complimentary to those of the existing building, to the reasonable satisfaction of Council.
3. The proposed finished floor level of any addition(s) shall complement the finished floor level of the existing building unless otherwise directed by Council.
4. The proposed building shall be clad with pre-painted sheet metal or shall be painted a subtle colour, to the reasonable satisfaction of Council.
5. All stormwater from the proposed development and associated paved areas shall be captured, stored, re-used or disposed of in a manner and with materials to the reasonable satisfaction of Council, such that it provides for orderly, sustainable and legal stormwater management, and does not result in the entry of water into, or affect the stability of a building and/or adjoining land. Any such stormwater management system shall be connected prior to the completion of the development.

Development Plan Consent Notes

- This application involves development located on the boundary or within close proximity to the boundary of the allotment. The applicant must ensure that the development is undertaken entirely on the subject land and that no part of the structure approved, including the guttering, encroaches any property boundary. To ensure that the proposed development is constructed within the allotment and at the approved set back, it is recommended that a site survey be undertaken to confirm the location of the relevant boundaries.
- The *Environment Protection (Water Quality) Policy 2003* requires any person who is undertaking an activity, or is an occupier of land to take all reasonable and practicable measures to avoid the discharge or deposit of waste from that activity or land into any waters or onto land in a place from which it is likely to enter any waters (including the stormwater system).

The policy also creates offences that can result in on-the spot fines or legal proceedings. The following information is provided to assist you to comply with this legislation:

- (1) Building and construction must follow sediment control principles outlined in the *"Stormwater Pollution Prevention - Code of Practice for the Building and Construction Industry"* (EPA, 1999). Specifically, the applicant must ensure:
 - During construction no sediment should leave the building and construction site. Appropriate exclusion devices must be installed at entry points to stormwater systems and waterways.
 - A stabilised entry/exit point should be constructed to minimise the tracking of sand, soil and clay off site. However, should tracking occur, regular clean-ups are advised.
- (2) Litter from construction sites is an environmental concern. All efforts should be made to keep all litter on site. The applicant should ensure that bins with securely fitted lids, capable of receiving all waste from building and construction activities, are placed on site.

ATTACHMENTS

040/2155/13

- (3) All building and construction wastewaters are listed pollutants under the *Environment Protection (Water Quality) Policy 2003* and as such must be contained on site.

It is important that you familiarise yourself with the terms of the Policy and ensure that all contractors engaged by you are aware of the obligations arising under it. For further information please contact the Environment Protection Authority on telephone 8204 2004.

- The granting of this consent does not remove the need for the applicant to obtain all other consents that may be required by other statutes or regulations.
