Schedule

Preliminary

To the purchaser:

The purpose of a statement under section 7 of the *Land and Business (Sale and Conveyancing) Act 1994* is to put you on notice of certain particulars concerning the land to be acquired. If you intend to carry out building work on the land, change the use of the land or divide the land, you should make further inquiries to determine whether this will be permitted. For example, building work may not be permitted on land not connected to a sewerage system or common drainage scheme if the land is near a watercourse, dam, bore or the River Murray and Lakes.

The *Aboriginal Heritage Act 1988* protects any Aboriginal site or object on the land. Details of any such site or object may be sought from the "traditional owners" as defined in that Act.

If you desire additional information, it is up to you to make further inquiries as appropriate.

Instructions to the vendor for completing this statement:

☐ means the Part, Division, particulars or item may not be applicable.

If it is applicable, ensure the box is ticked and complete the Part, Division, particulars or item.

If it is not applicable, ensure the box is empty or strike out the Part, Division, particulars or item. Alternatively, the Part, Division, particulars or item may be omitted, but not in the case of an item or heading in the table of particulars in Division 1 of the Schedule that is required by the instructions at the head of that table to be retained as part of this statement.

* means strike out or omit the option that is not applicable.

All questions must be answered with a YES or NO (inserted in the place indicated by a rectangle or square brackets below or to the side of the question).

Buyers information notice

Prescribed notice to be given to purchaser

Before you buy a home there are a number of things that you should investigate and consider. Though it may not be obvious at the time, there could be matters that may affect your enjoyment of the property, the safety of people on the property or the value of the property.

The following questions may help you to identify if a property is appropriate to purchase. In many cases the questions relate to a variety of laws and standards. These laws and standards change over time, so it is important to seek the most up to date information. Various government agencies can provide up to date and relevant information on many of these questions. To find out more, Consumer and Business Services (CBS) recommends you check the website: www.cbs.sa.gov.au.

Consider having a professional building inspection done before proceeding with a purchase. A building inspection will help you answer some of the questions below.

Does the council hold details of any development approvals relating to:

- a) commercial or industrial activity at the land; or
- b) a change in the use of the land or part of the land (within the meaning of the repealed Development Act 1993 or the Planning, Development and Infrastructure Act 2016)?

NO

Description of the nature of the development(s) approved:

Note—

The question relates to information that the council for the area in which the land is situated may hold. If the council answers "YES" to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from the council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A "YES" answer to paragraph (a) of the question may indicate that a potentially contaminating activity has taken place at the land (see sections 103C and 103H of the Environment Protection Act 1993) and that assessments or remediation of the land may be required at some future time.

It should be noted that—

- *the approval of development by a council does not necessarily mean that the development has taken place;*
- *the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.*

The information herein is provided pursuant to the Council's obligations under Section 7 of the Land Business (Sales Conveyancing) Act 1994.

Only that information which is required to be provided has been given and that information should not be taken as a representation as to whether or not any other charges or encumbrances affect the subject land.

I, Harry Gunn, Administration Officer of the City of Marion certify that the information provided in these responses is correct.

Notes

From the documentation supplied to our office the proposed builder is a building work Contractor who is a Contractor of the SA Housing Trust and therefore the building work Contractor is exempted from the provisions of supplying Indemnity Insurance.

This consent does not include any Brush Fencing, which shall be the subject of a separate consent by the relevant authority at an alternative date.

All services shall be insulated in strict accordance with BCA-Part 3.12.5 for energy efficiency purposes

Structural timbers members that are not protected from weather must be of a suitable durability class or preservative treated to hazard level H3 in accordance with AS1604.

The assessment of the timber framing has been based on the understanding that the timber to be used for all structural elements has a minimum joint strength group of J4 or JD4.

This consent does not include any possible retaining walls exceeding 1.0 metre in height. This will obviously be determined on site and require a separate application to be submitted for building rules consent if the limit of 1.0 metre is exceeded.

Set-off dimensions shall be from the allotment boundaries and not necessarily the fence lines.

A person proposing to undertake or undertaking building work on land (or who is in charge of such work) must give Council notice at stages prescribed in Regulation 74

As the building owner proposes to carry out work of a prescribed nature in accordance with the building regulations, that is work which affects the stability of other land or premises, the building owner, must, at least 28 days before the building work is commenced cause to be served on the owner of the affected land or premises a notice of intention to perform the building work and the nature of that work, as required by Section 60.

The height of the damp proof courses or flashing shall be no less than 275mm above the adjacent finished ground level for all walls along the allotment boundary and 75mm above the finished paved or concrete areas graded no steeper than 1 in 20 for the first metre away from the building for all other walls.

All glazing shall be in accordance with AS 1288 & AS 2047, including safety glass for full height windows, glazed doors, side panels and windows located over or adjacent to a bath/shower.

A person must not occupy a Class 1a building under the Building Code before a notice of completion of building work is given. The relevant person (a licensed builder or if no such builder exists, a registered building work supervisor or a private certifier) must provide a written statement to the relevant authority in accordance with the requirements of regulation 83AB. This statement must declare that the building work carried out on the building is in accordance with the relevant approval (disregarding any variations of a minor nature which has no adverse effect on the structural soundness or safety of the building, or on the health of the occupants of the building, or any variation undertaken with the written consent of the relevant authority).

The onus of proof of the boundary line shall rest with the building owner. This could necessitate a survey being carried out by a licensed surveyor. The building owner will require the neighbour's approval to enter their land to carry out any work.

No portion of the structure or the attachments to the structure shall extend over the property boundary.

The discharge of storm-water along council land requires the consent of the council prior to the commencement of site-works (seek advice from Council's Engineering Department).

All roof & surface storm-water must be disposed of in a way that will not cause damage to the building and not cause damage or nuisance to any other property of building.

The roof & surface storm-water drainage system must be constructed in accordance with AS/NZS 3500.3: Part 3 – Storm-water drainage, or AS/NZS 3500.5 Domestic installations, Section 5 – Storm-water drainage.

The proposed building(s) must be protected against attack by subterranean termites in accordance with AS3660.1. The owner must be aware that a durable notice must be permanently fixed to the building in a prominent location, such as a metre box or the like, indicating (i) The method of termite risk management, and (ii) The date of installation of the system, and (iii) where a chemical barrier is used, its life expectancy as listed on the National Registration Authority label, and (iv) The installer's or manufacturer's recommendations for the scope and the frequency of future inspections for termite activity

CONSTRUCTION AT OR NEAR BOUNDARY:

A perimeter barrier shall be installed to the construction at or near the boundary. Building owners should be aware that this type of construction could result in a greater risk of termite entry due to one or a combination of the following reasons:

- (a) Concealed entry by termites occurring to the structure because of the specific construction method used.
- (b) Lack of access for the installation of a barrier during construction.
- (c) Lack of access for inspection and maintenance.
- (d) The actions of adjoining owners, which may compromise the effectiveness of the barrier after completion of the construction phase.

Job No.: CSA3992

NOTES: (1) Where construction at or near the boundary is carried out, it may not be possible to install a barrier system as specified in this Standard. These situations may include duplexes, villas, townhouses, parapet walls, buildings with zero setbacks to an allotment boundary on separate title allotments, and the like.

(2) Where a barrier system can not be provided in accordance with this Standard, full documentation on the limitations of the barrier system installed should be provided to the building owner (see Appendix A of A3660.1). Where possible, more frequent inspections should be undertaken.

Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)

Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

Land Tax Act 1936 and Regulations thereunder

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

Landscape South Australia 2019

Water Resources Management - Taking of underground water

Under the provisions of the *Landscape South Australia Act 2019*, if you intend to utilise underground water on the land subject to this enquiry the following apply:

- A well construction permit accompanied by the prescribed fee is required if a well/bore exceeding 2.5 meters is to be constructed. As the prescribed fee is subject to annual review, you should visit the webpage below to confirm the current fee
- A licensed well driller is required to undertake all work on any well/bore
- Work on all wells/bores is to be undertaken in accordance with the *General specification for well drilling operations affecting water in South Australia*.

Further information may be obtained by visiting <https://www.environment.sa.gov.au/licences-and-permits/water-licence-and-permit-forms>. Alternatively, you may contact the Department for Environment and Water on (08) 8735 1134 or email DEWwaterlicensing@sa.gov.au.
