**Note –**

The question relates to information that the council for the area in which the land is situated may hold. If the council answers “YES” to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A “YES” answer to paragraph (a) of the question may indicate that a potentially contaminating activity has taken place at the land (see sections 103C and 103H of the Environment Protection Act 1993) and that assessments or remediation of the land may be required at some future time.

It should be noted that –

- the approval of development by a council does not necessarily mean that the development has taken place;
- the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.

Notices are printed under arrangement with organisations having some potential interest in the subject land. You should contact the identified party for further details.

### **Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)**

#### Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

#### Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

#### ***Land Tax Act 1936 and Regulations* thereunder**

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

#### ***Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations***

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

26. The rest of this encumbrance is not affected if any clauses are read down or severed.

## **Payment of costs**

27. The costs incidental to the preparation of this encumbrance, and the stamp duty and registration fee on it, must be paid by the Owner

### **Design Guidelines**

THE VILLAGE GREEN  
—ALDINGA—

DEVELOPMENT GUIDELINES

April 2016

## 1. The Village Green Development Vision

### 1.1. About The Village Green

The Village Green is a boutique residential development located within a spectacular natural setting in Aldinga Township. It is being developed with consideration of providing quality housing solutions and supporting the wider objectives of sustainability and social interaction.

### 1.2. Design Philosophy

A key goal of The Village Green is the promotion of sound design

philosophies built on:

- Project vision, design and presentation excellence;
- Innovation in dwelling and land product to offer stylish, contemporary living;
- Sensitive environmental management; and
- Responsible management of stormwater and the promotion of sound environmental sustainability principles

To achieve these aims a level of development guidance is required in the form of Development Guidelines.

## 2.0 Protecting Your Investment

All purchasers in The Village Green must comply with these design guidelines which ensures standards are maintained and your investment is protected.

This means:

- The Guidelines are legally binding via an Encumbrance over each allotment
- Each land purchaser must obtain Encumbrance Approval prior to building
- Guidelines are additional & not in lieu of other statutory requirements.
- Council approvals
- No re-subdivision of allotments is permitted
- Construction must commence within 24 months from the date that the land purchase contract is executed and homes should be completed without undue delay
- Front landscaping must be completed within 6 months of building completion
- Vacant allotments must be kept in an orderly fashion
- The Encumbrance will have a Sunset Clause to extinguish it from the title upon 2 (Two) years from the last allotment sold

The Village Green Aldinga Development Company has appointed an Encumbrance Manager who may at their discretion approve an application which does not comply with these guidelines but demonstrates architectural merit and is in keeping with the overall vision of the development.

### **3.0 About the Development Guidelines**

#### **3.1. Purpose of the Development Guidelines**

The purpose of The Village Green Development Guidelines is to ensure that the physical arrangement of buildings and their relationship to each other and the surrounding environment reflects the vision for the development.

The Guidelines address the quality of the built form and landscape both in terms of appearance and the achievement of sustainability initiatives.

The Guidelines are provided to assist purchasers, designers and builders. They aim to create high quality built form outcomes that together with the surrounding natural environment enhance the community lifestyle over time. They provide certainty about the quality of dwellings and gardens, and how they interact with neighbouring public open spaces.

The guidelines should be used in conjunction with the City of Onkaparinga Development Plan as it provides a full range of development controls for residential development in this area as well as the Development Act and Development Regulations (including the Residential Code).

These guidelines form part of an Encumbrance that is attached to the Certificate of Title of all allotments within The Village Green. Thus, purchasers are contractually obligated (and protected) to comply with these guidelines (unless a variation is agreed to by The Encumbrance Manager)

The Guidelines have been formulated to allow a sufficient level of flexibility that can cater for individuality and personal choice of purchasers and designers.

#### **3.2 Development Guidelines Structure**

The structure of the Development Guidelines follows the design process and is set out as follows:

About the Development Guidelines: A background to the development guidelines and its role in the approving of your development;

**Siting your Dwelling: How to best design and site you're dwelling to create your dream home;**

**Sustainability Principles: A sustainability focus for the development of all dwellings;**

**Building on your Site: Steps to maintain a safe, orderly and environmentally responsible building site;**

**Appendices:**

- Appendix A: Development Guidelines Submission Form - To be completed and submitted with your dwelling design.
- Appendix B: Building Envelope Plan - A plan showing the limit of building construction and minimum boundary setbacks.
- Appendix C: Landscape Plan.

### **3.3. Development Approval Process**

When you purchase an allotment within The Village Green, you will note that an Encumbrance including these Development Guidelines has been registered on the Certificate of Title. These documents require that prior to commencement of any development on your allotment you must in addition to a Development Approval, have satisfied the requirements of this Encumbrance.

If it is uncertain whether or not a proposed development adheres to the requirements of these Development Guidelines, a sketch or concept plan should be provided to and assessed by the City of Onkaparinga Development Services Section before drawings are finalised for formal submission. This is to ensure the process is streamlined to avoid additional costly design work.

Simon Cross has been appointed as 'The Encumbrance Manager to be the administrator of these Development Guidelines. All documents required as part of the assessment of the Encumbrance, must be forwarded with your Development Application to;

**Attention: The Village Green Aldinga**

**By Email: [simon@crosscompany.com.au](mailto:simon@crosscompany.com.au)**

**By Post: S & A Cross Pty Ltd - PO Box 149 Crafers, South Australia 5152**

The list below illustrates the approval process:

- Check Guidelines: To see if there are any conditions or prerequisites for your site.
- Preliminary Design: Prepare plans for your site. This can be in the form of a simple sketch of the dwelling you plan to put on your site. You may wish to discuss this early design with 'The Encumbrance Manager to better finalise the design.
- Design: At this stage adjustment should be made to the preliminary design in preparation to submit a formal application.
- Application: Submit your Development Application, which must also include all plans and relevant information for the assessment against the Encumbrance guidelines.

- Plans & Information required for approval:
  - Scaled & dimensioned plans & elevations
  - Site works plan - including contours, bench levels, finished floor levels, retaining walls, fencing, driveway (incl. grade as to constructed kerb levels), setback and relation to northern daylight

Your plans will also be assessed against the requirements of this Encumbrance. Once approved, Building Certification will be required to allow your Development Approval to be issued and construction can then commence.

- Construction: The construction of your dwelling must commence within 24 months of the date of your land purchase contract with building completion being achieved without undue delay.
- Landscaping: Front landscaping must be completed within 6 months of building completion. Appendix C shows suggested plant species that will complement the development vision.
- Inspection: Once the construction of your dwelling has been completed The Encumbrance Manager may examine the works to ensure there is compliance with the approved plans. This is in addition to normal Council inspections.

- Fee: A fee of \$150 plus GST is required to administer this encumbrance process. Fees should be made payable to S & A Cross Pty Ltd. These fees are in addition to the statutory fees associated with Development Approval.

## 4.0 Siting Your Dwelling

- 4.1 Planning Design Principles Land Use: Consideration is placed on land use to ensure the development is consistent with both the overall vision of the City of Onkaparinga and The Village Green development.

- 4.1.1 Planning the Siting of your Dwelling: Building Envelope and Set-backs – a Building Envelope Plan (BEP) is prepared for each allotment that specifies the area of the site within which your dwelling should be located (refer to Appendix B). The siting of your dwelling has to comply with the building envelope in order to gain Encumbrance Approval.

- 4.1.2 Setbacks: Building setbacks will generally be as per the BEP
  - 3.0m to the front main building line on ground level (Open verandas and porticos may be forward of this to a minimum 2.0m)

- 5.0m to the front main building line on upper level
- 3.0m from the rear boundary to rear main building line on ground level
- 5.0m from the rear boundary to rear main building line on upper level

#### 4.1.6 Incurred Costs

- Costs associated with the relocation, removal or establishment of any infrastructure services, utilities, street trees, landscaping, footpaths, kerbing, fencing, retaining walls, driveways etc. that are required due to the design and siting of the dwelling must be paid for by the purchaser/owner.

**4.1.3 Site Coverage:** The proposed building should be sited to allow for enough coverage to cater for appropriate dimensions, based on allotment size, of both private open space and landscaping space on the site.

**4.1.4 Private Open Space (POS) - The intent of the Village Green - Aldinga Guidelines is to ensure a pleasant environment when outdoor and indoor elements of the dwelling are linked. - If the allotment size is between less than 300m<sup>2</sup> it must have a minimum POS area of 24m<sup>2</sup>

#### 4.1.5 When calculating your POS:

- As part of the open space an area of at least 4m x 3m (12m<sup>2</sup>) that is directly accessible from a living area must be provided.

- Any owner works as per above must satisfy the overall vision of the site, thus construction must match existing infrastructure in terms of colour and material choices as well as location etc.

#### 4.2. Building Requirements

These guidelines encourage the design of a dwelling to consider the orientation or location of the site. The use of different levels, articulation, placement of windows and spaces and indoor-outdoor living spaces etc. can all be advantageously implemented to improve the purchaser's quality of life through views and allowing for maximum natural light.

### 4.3.4 Dust Emissions

- Dust Emissions: The emissions of dust should be minimised as it is a major pollutant to stormwater and a significant nuisance to neighbouring residents.

Steps that can be taken to lessen the spread of dust include:

- Regularly coating roadways, entrances and main traffic areas with dust suppressants. Watering regularly can also minimise dust;
- Large construction sites must have a water supply and applicator on-site to ensure dust suppression; and
- When dust emissions present are deemed hazardous in nature, provisions must be taken to ensure the dust is contained, collected and disposed of aptly to prevent release into the air or stormwater.

#### **5.2. Disposal of excavated material**

Spoil that has been excavated during construction of footings or landscaping must not be placed or stored on adjoining properties unless written approval has been given by the property owner;

- Spoil must be removed immediately if possible;
- The spoil collected and stockpiled must be covered or watered to prevent dust from spreading into adjoining allotments;
- Spoil must not be stockpiled within 1m of a street tree or associated landscape;
- Spoil that is stockpiled on vacant land must be scraped clean to its original state with all traces of spoil removed once completion of the property has been achieved; and
- Failure to remove spoil upon the completion of the property, Council will arrange for removal and charge the property owner for removal of the spoil.

#### **5.3. Damage to Footpaths, Driveways Crossovers and Streetscape Planting**

It is the owner's responsibility to rectify any public footpaths, driveway crossovers and streetscape planting if damaged during the construction of the dwelling.
